EDUCATION

University of Wisconsin Madison, Madison, WI

May 2027

- Bachelor of Science in Computer Science and Data Science
- Relevant Coursework: Algorithms, Database Management Systems, Machine Learning

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript/TypeScript, SQL, R, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Express, Flask, FastAPI, Pandas, NumPy, Matplotlib

Databases & Tools: PostgreSQL, SQLite, Prisma, Git/GitHub, Jupyter Notebook, Vercel

AI & APIs: Anthropic Claude API, REST APIs, Slack Webhooks, prompt engineering

PROJECTS

Stock Data Pipeline | Python, PostgreSQL, SQLAlchemy, Neon, REST APIs

May 2026

- Engineered a modular ETL pipeline to ingest, transform, analyze, and visualize 6 years of daily OHLCV market data across 8 tickers
- Built technical indicators including SMA-20/50, Bollinger Bands, RSI-14, MACD, and annualized volatility using SQL window functions and pandas
- Computed rolling 30-day Pearson correlations across ticker pairs to identify diversification patterns and asset relationships
- Created an interactive Streamlit dashboard with price charts, volatility rankings, correlation heatmap, sortable metrics table, and automated Slack alerts

MoneyMap — Full-Stack Budget Tracker PWA | Next.js 14, TypeScript, Supabase, Tailwind CSS

May 2026

- Built a full-stack personal finance PWA with Google OAuth, Supabase PostgreSQL, row-level security, and real-time data sync across devices
- Designed a multi-dimensional data model across categories, currencies, locations, and time, supporting 500+ real expense entries and monthly spending analysis
- Implemented live exchange-rate conversion, recurring payment templates, custom categories, and per-category budget tracking with progress alerts
- Deployed as an installable iPhone PWA with multilingual support across 7 languages and locale-aware date/number formatting

Common Ground - AI Classroom Discussion Tool | Node.js, Express, PostgreSQL, Anthropic Claude API, Render

Apr 2026

- Built a real-time classroom discussion tool using Claude to surface shared values and genuine tensions across student perspectives on contested topics
- Designed session-based architecture with QR code joining, live result broadcasting, and AI-powered analysis distinguishing common ground from values-level disagreement
- Selected as finalist in Anthropic × CDIS Speed-Hackathon

ScoutEdge - Tactical Football Transfer Intelligence Platform | Next.js, TypeScript, Tailwind CSS, Anthropic Claude API, Vercel

Mar 2026

- Built a full-stack football analytics platform delivering AI-assisted squad analysis, transfer verdicts, player-system fit scoring, and manager-specific team-building recommendations
- Designed a multi-source data pipeline combining football-data.org, API-Football, FotMob, Transfermarkt, and local fuzzy search to separate verified player/club data from LLM-generated tactical reasoning
- Engineered reliability guardrails for AI outputs, including structured JSON extraction, fallback retries, prompt caching, hallucination prevention, and fact-grounding rules for contracts, valuations, club names, and player status
- Created interactive product surfaces including squad-fit maps, transfer target cards, scenario comparisons, availability-aware re-analysis, verdict pages, and expandable tactical summaries

WORK EXPERIENCE

Culinary Assistant & Shift Lead, Liz's Market, Waters Residence Hall, UW-Madison, Madison, WI

Nov 2024 – Jul 2025

- Supervised team of 5-8 kitchen staff in high-volume dining facility serving 500+ meals daily
- Trained 10+ new employees on safety protocols and workflow optimization

Cashier, Four Lakes Market, Dejepe Residence Hall, UW-Madison, Madison, WI

Dec 2025 - Present

- Handled 200+ daily cash and card transactions in a fast-paced university dining environment

Military Service, Basic Training (KOREA Army) and Social Service Agent, Ulsan, South Korea

Oct 2022 – Jul 2024

- Completed rigorous military training, developing discipline and adaptability in structured environments
- Provided care and support for elderly residents with dementia, exercising patience and clear communication
- Collaborated across diverse age groups (20s-100s) in a mission-critical care facility
